

WordPress

Current version: 6.9.1 (You already have the latest version of WordPress.)

Plugin Updates Performed

- Akismet Anti-spam: Spam Protection → updated to 5.6
- Contact Form 7 → updated to 6.1.5
- Contact Form 7 – Dynamic Text Extension → updated to 5.0.5
- Really Simple CAPTCHA → updated to 2.4

Theme Updates Performed

- Twenty Twenty-Three → updated to latest version

Maintenance Steps Completed

- Disabled automatic updates for WordPress core, plugins and themes
- Updated PHP version on the server
- Manually updated WordPress core from 6.3.7 to 6.9.1
- Updated all pending plugins
- Updated inactive theme
- Cleared website cache
- Performed functionality testing (homepage, admin panel, contact page)
- Observed CAPTCHA shortcode displaying instead of visual CAPTCHA after plugin update

CAPTCHA Observation

The contact page currently shows the shortcode [recaptcha] instead of the CAPTCHA field. The plugin 'Really Simple CAPTCHA' is active but deprecated for newer versions of Contact Form 7. Recommended fix: configure Google reCAPTCHA from Contact → Integration and add Site Key and Secret Key.
